EM ballast type

BHL 250W
BSN 250W
BHL 400W
BSN 400W

The product is compatible with BHL/BSN ballasts, see above table.
The product is NOT compatible with electronic ballasts
The product is NOT compatible with CWA type of ballasts/transformers

TForce LED HPI UN 95-250W	TForce LED HPI UN 140-400W

[illegible]

Note

- For enabling compatibility, the "Igniter comfort logic" function is equipped to simulate the low light level at start up of HID lamps, which in some cases can be observed as a short reduction of the light output of the lamp.
- In rare cases the igniter comfort logic cannot stop the igniter. This is visible as continuously flicker of the light. Signify advises to remove/disconnect the igniter.
- Instant ON/OFF – does not require to warm up or to cool down before restart.
- The compatibility of the lamp with the gear is measured in the laboratory at nominal voltage (230VAC). The performance in real applications can be different.
- Manufacturers of ballasts and igniters can change the technical design of their product without informing LED lamp suppliers. These changes can influence the performance of LED products. Signify cannot be held responsible for inaccuracies in the compatibility lists due to technical changes in ballasts or igniters.

Disclaimer:

Philips will not accept claims for any damage caused by implementing the recommendations in this document. More information:

BHL 125W				
BSN 100W				
BSN 150W				
BSN 250W				
BHL 250W				
Direct Mains/ Bypass Ballast				

The product is compatible with BSN and BHL ballast (or similar models from other suppliers), see above table.
The product is NOT compatible with electronic ballasts
The product is NOT compatible with CWA type of ballasts/transformers

- Note**
- The lamp is not compatible with any igniter. Ignitor should be removed.
 - To get a decent PF, the power factor compensation capacitor should be removed.
 - Instant ON/OFF – does not require to warm up or to cool down before restart.
 - The compatibilty of the lamp with the gear is measured in the laboratory at nominal voltage (230VAC). The performance in real applications can be different
 - Manufacturers of ballasts can change the technical design of their product without informing LED lamp suppliers. These changes can influence the performance of LED products. Signify cannot be held responsible for inaccuracies in the compatibility lists due to technical changes in ballasts.

Disclaimer:
Philips will not accept claims for any damage caused by implementing the recommendations in this document. More information:
